

THE LIVE DRAWING PROJECT

Art installation of real time collaborative drawing

What is it ?

*The Live Drawing Project is a project of **real time collaborative drawing** aiming to create interactive and fun drawing experiences for everyone.*

The public is invited to draw freely on their smartphones. Their drawings are then video projected in real time on a wide surface creating a unique collaborative artwork.

Drawings become alive on the canvas. They appear, disappear, change colours and move in a moving composition sometimes poetic sometimes surprising.

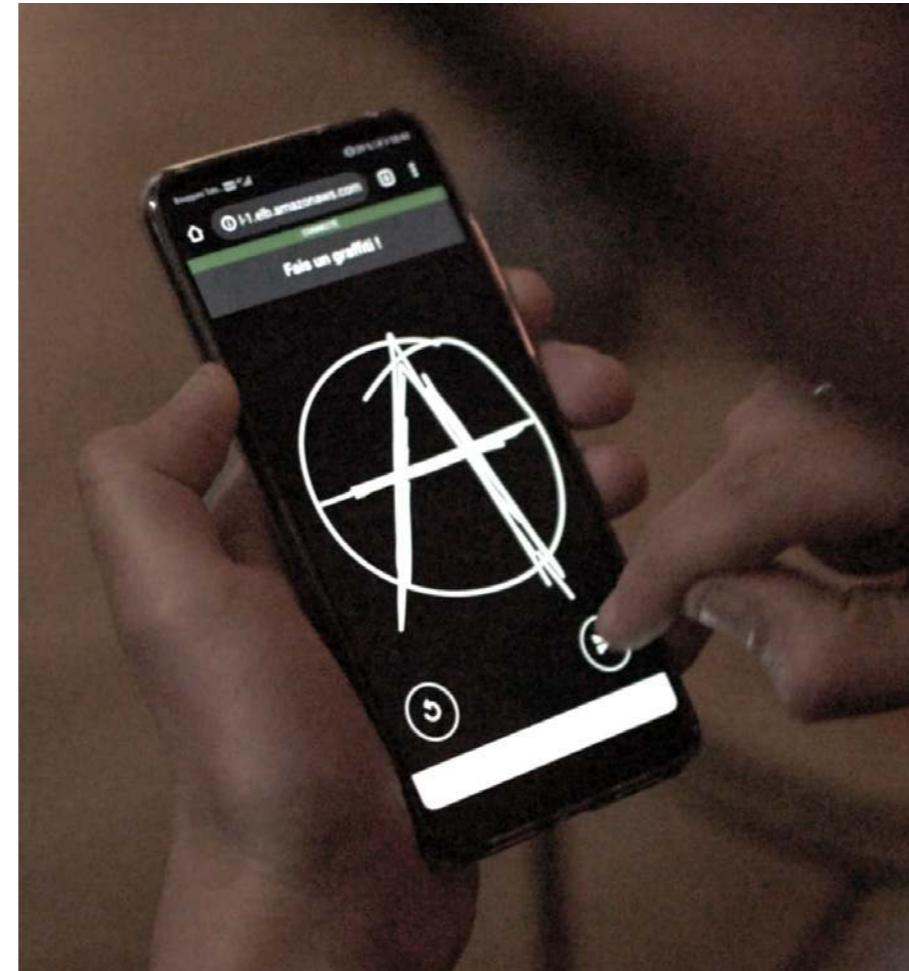

How does it work ?

*Our system is designed to be **accessible to everyone** and **very intuitive**.*

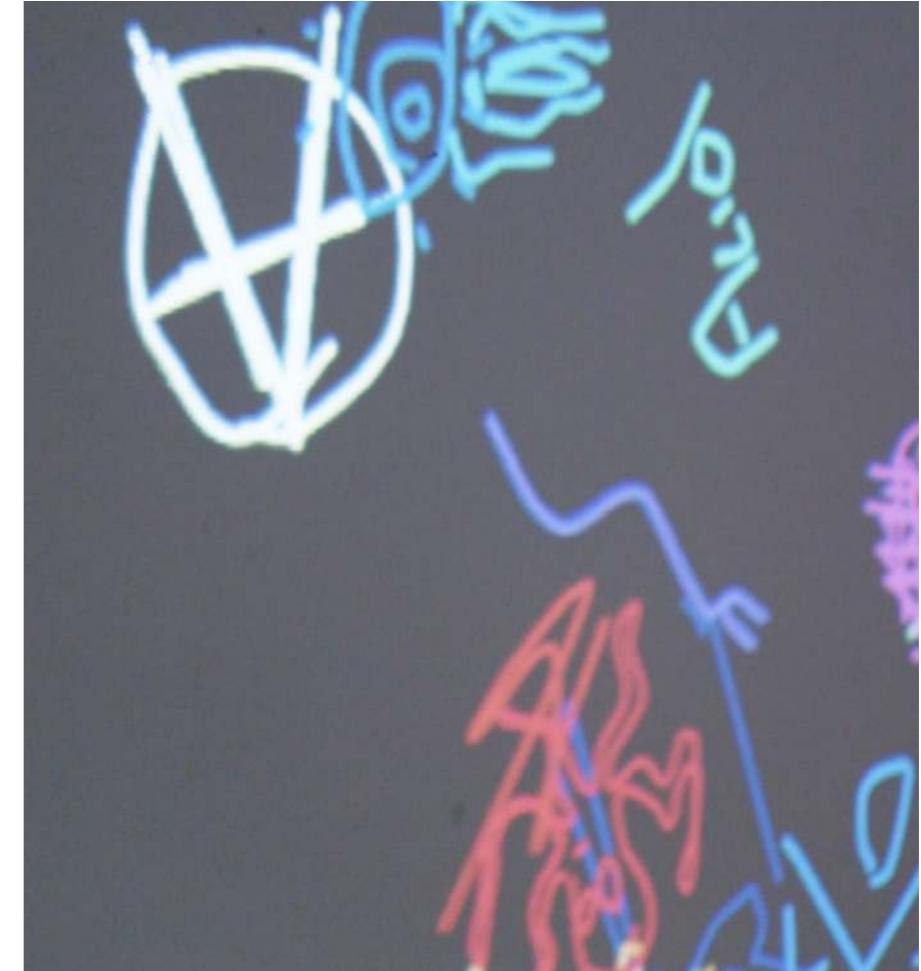

We work hard to make sure everyone can participate without any difficulties.

1. The user arrives in front of the collaborative artwork. He takes his smartphone and goes to our website.

2. He arrives on a web page where he can draw immediately, no need to download an application.

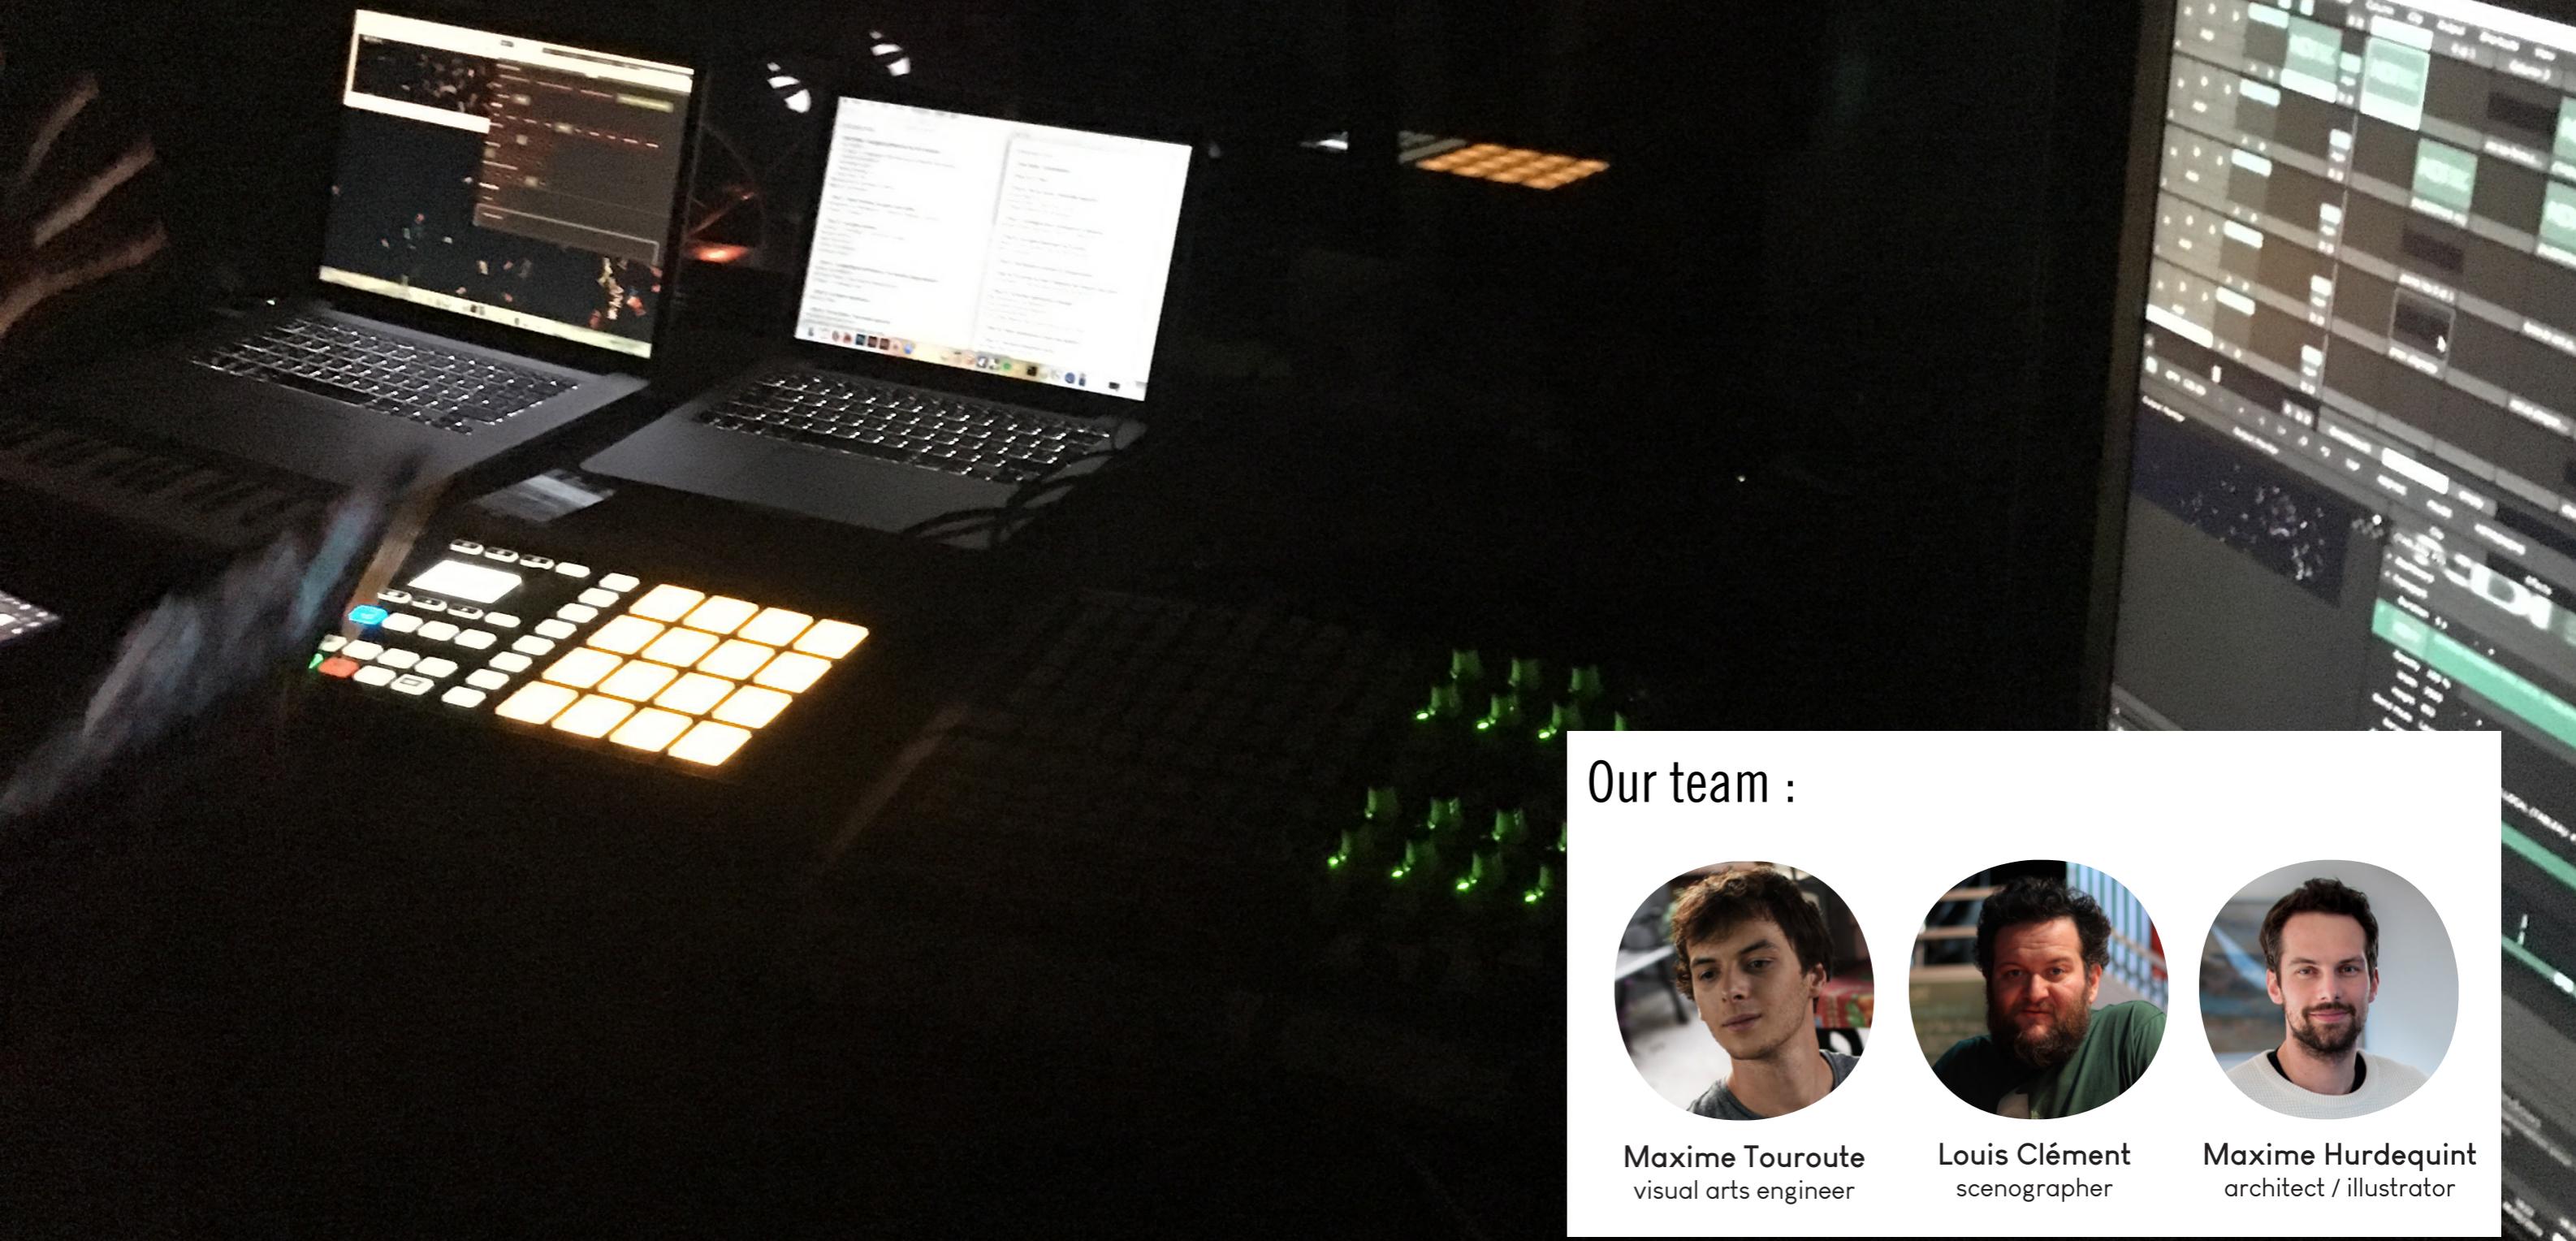

3. The user draws on its smartphone using fingers or a stylus. When finished, the user sends his drawing in a single clic.

Our mission :

*Drawing is a way to express ourselves without barriers.
We're a team of scenographers, engineers and artists willing
to make people draw together.*

We want to put the audience at the center of the creative process. With The Live Drawing Project, we

aim to create a creative playground where everyone can participate, create and have fun through new experiences.
